

DMIT1530 In-class Assessment Two

Web Fonts and Text Styling

2020 Winter Semester

Due: End of Class

Weight: 5% of your final grade

Introduction

Download the files provided by your instructor. You must utilize the provided HTML (i.e. the HTML should not be changed). You are tasked with adding the styles needed to position, size, and style the textual content to match the provided wireframe as closely as possible. The details of the build follow:

The Build Methodology

1. The site header h1 should make use of the Lane Narrow font family found on the Font Squirrel website
 - a. Search for Lane
 - b. Click on the text of the middle (which will be Lane)
 - c. Select **Webfont Kit**
 - d. Choose all the font formats
 - e. Click the **DOWNLOAD @FONT-FACE KIT** button (can save to the Downloads folder)
 - f. Extract the contents of the ZIP file
 - g. You will need the font files from the lane-narrow_regular_macroman folder copied to a **font** folder on your web project
 - h. In the `stylesheet.css` file in this folder has the `@font-face` directive which can be copied into the `main.css` file of your web project (you will need to fix the path)
2. The remainder of the text should make use of the Raleway font found on the Google fonts website.
3. The root font size for the page should be based on 18px
4. Utilize the border-box box-sizing method for this page.
5. All sizing must be done in rems.
 - a. Update the `.container` width to make use of rems and not pixels
6. The site header h1 should be 100px from the top of the page
7. The project section should be 100px from the site header h1
8. There should be 27px of space between the project image and the project textual content
9. Add all required styles to closely replicate what you see in the wireframe
 - a. High-res versions are available in the download package
10. Validate and repair any deficiencies
11. Demonstrate the completed web page and your successful validation for your instructor
